Interactive voice response is a technology that allows a computer to interact with humans through the use of voice and DTMF (dual-tone multi-frequency signalling) keypad inputs.

It means you can use your telephone to navigate your way through a computer by either selecting the numbers on your telephone keypad or by using simple voice commands.

19. Why do I need to call the IVR?

Certain things can only be done out using the IVR. These include:

- Pin retrieval - Your PIN is no longer sent in the post. This is because post is not completely secure. To get your PIN, you must use the IVR.
- Card activation- When your card arrives you need to activate it using the IVR. You only need to do this once for each card.
- Pin recall- You can be reminded of your PIN from the IVR if you have forgotten it.

You can check your balance or report your card lost or stolen using the IVR numbers.
